PROFILE

Final year Computer Science student at Manchester Metropolitan University, building backend systems in Python with FastAPI and PostgreSQL. My projects include a banking platform with a double entry ledger and row level locking to keep balances consistent during transfers, a football analytics tool using Monte Carlo simulations, and a real time messaging app with authentication and access control. I use Git, Docker and pytest in my projects and have deployed applications to Railway. I have also used the Gemini API in PremierIQ to turn match data and simulation results into written match analysis. Alongside my degree I work as an IT Advisor, resolving hardware, software, network and account issues for staff and students. I am looking for a software engineering role where I can keep developing and take on harder technical problems.

TECHNICAL SKILLS

Languages: Python, SQL, C#, Java, JavaScript, TypeScript

Backend: FastAPI, Flask, SQLAlchemy, REST APIs, JWT authentication

Databases: PostgreSQL, SQLite, transactions, indexing, row level locking

Tools: Git, GitHub, Docker, Docker Compose, pytest, Railway, Google Gemini API

Systems and IT: Networking, SCCM, Windows, macOS, Microsoft 365, MFA, troubleshooting

PROJECTS

NovaBank · Python, FastAPI, SQLAlchemy, PostgreSQL, Docker Compose, Railway · 2026

- Online banking application covering accounts, transfers, savings pots, spending insights and card freezing.
- Built transfers around a double entry ledger, with matching debit and credit entries written in the same database transaction.
- Used PostgreSQL row level locking to stop concurrent transfers from corrupting account balances, with 11 pytest tests covering the ledger and transfers.
- Added JWT authentication, bcrypt password hashing and login rate limiting, then deployed the backend to Railway.

PremierIQ · Python, FastAPI, Next.js, NumPy, Google Gemini API · 2026

- Premier League analytics platform combining live football data with match prediction and simulation.
- Built a match prediction model using recent form and home and away scoring data, then ran 10,000 Poisson Monte Carlo simulations per fixture.
- Built a FastAPI backend pulling from football and weather APIs, with an in process cache to reduce repeated requests.
- Used the Gemini API to turn the football data and simulation results into written match analysis, while keeping API credentials server side.

ChatWire · Python, Flask, Socket.IO, SQLite · 2026

- Real time messaging application with live message delivery and persistent channel history.
- Used Socket.IO for live communication between users and cursor based pagination for channel history.
- Implemented bcrypt authentication, signed session tokens, login lockout and access control checks.
- Wrote 24 pytest tests covering authentication, access control and socket functionality.

ApexIQ · Python, FastAPI, Next.js · 2026

- Formula 1 dashboard bringing together live timing, circuit data and championship standings.
- Built the FastAPI backend using external F1 data sources, with live timing, circuit visualisation and driver comparison features.
- Kept API credentials server side.

EDUCATION

BSc (Hons) Computer Science · Manchester Metropolitan University · Sep 2023 to May 2027

BTEC Level 3 Extended Diploma in Engineering (DDD) · Milton Keynes College · Sep 2013 to Jul 2015

EXPERIENCE

IT Advisor · Manchester Metropolitan University · Sep 2025 to Present · Part time

- Diagnose hardware, software, account and network issues for staff and students through the university service desk.
- Image and deploy Windows PCs and Macs using SCCM, and support Microsoft 365, MFA and campus printing.
- Manage a busy ticket queue on Freshservice while explaining technical issues clearly to users.

Sales Advisor · Belstaff, Manchester · Oct 2024 to Oct 2025

- Used SQL to query customer data and segment clients by purchase history for targeted outreach.
- Worked towards individual sales targets in a luxury retail environment.

Retail Leadership · Origin Kicks, Selfridges, UNIQLO, Anya Hindmarch, Ralph Lauren, Harding Brothers · 2017 to 2024

- Progressed through supervisory and loss prevention roles across luxury and high street retail, including leading a sales team during cruise ship deployment.
- Trained junior staff, managed customer facing operations and helped introduce processes to reduce stock loss.

ADDITIONAL INFORMATION

- Available to start from May 2027.
