PROFILE

Final year Computer Science student who builds backend systems end to end, from database design through to the interfaces people use. Alongside my degree I work as an IT Advisor, diagnosing problems for staff and students and explaining technical detail clearly to people with different levels of knowledge. I also have several years of experience in customer facing and supervisory roles, where I trained staff and took responsibility for day to day performance.

TECHNICAL SKILLS

Languages: Python (main), SQL, C#. Some Java and JavaScript.

Databases: PostgreSQL, SQLite. Schema design, transactions, row level locking, indexing.

Backend and tooling: FastAPI, Flask, SQLAlchemy, REST, JWT, Git, Docker Compose, pytest.

PROJECTS

PremierIQ | Python, FastAPI, Next.js, NumPy | 2026

- Premier League dashboard with live standings, match simulation, squads, a stadium map and remaining fixture Season IQ.
- Match IQ blends season form, last five games, venue, head to head and second half rates, then runs 10,000 Poisson Monte Carlo draws.
- FastAPI talks to football-data.org and weather APIs behind an in process cache. Keys stay on the server. Optional Gemini narrates the simulation JSON only.

NovaBank | Python, FastAPI, SQLAlchemy, PostgreSQL | 2026

- Online banking application with accounts, transfers, savings pots with round ups, spending insights, card freeze and an admin audit panel.
- Built on a double entry ledger: every transfer writes a balanced debit and credit inside a single database transaction, so the books cannot go out of balance partway through.
- Used row level locking on account rows to keep concurrent transfers correct, and wrote tests that run against a real PostgreSQL instance to exercise that path rather than mocking it.
- JWT authentication, bcrypt password hashing, rate limited login, masked card numbers and ownership checks on every route.
- 11 pytest cases across the ledger and transfer path, with Docker Compose to bring up PostgreSQL locally.

ChatWire | Python, Flask, Socket.IO, SQLite | 2026

- Real time messaging application using Socket.IO for live message delivery, with cursor pagination over channel history and rate limits on writes.
- Authentication with bcrypt and signed session tokens, plus login lockout after repeated failed attempts.
- 24 pytest cases covering authentication hardening, access control checks and socket flows.

EDUCATION

BSc (Hons) Computer Science | Manchester Metropolitan University | Sep 2023 – May 2027

BTEC Level 3 Extended Diploma in Engineering – DDD | Milton Keynes College | Sep 2013 – Jul 2015

EXPERIENCE

IT Advisor | Manchester Metropolitan University | Sep 2025 – Present · Part time

- Diagnose hardware, software, account and network issues for staff and students on the university service desk.
- Image and deploy Windows PCs and Macs, and support Microsoft 365, MFA and campus printing.
- Work a busy ticket queue, reproducing problems from vague reports and following them through to a fix.

Sales Advisor | Belstaff, Manchester | Oct 2024 – Oct 2025

- Wrote SQL against the customer database to segment clients by purchase history for targeted outreach.
- Worked to individual sales targets in a luxury retail environment.

Supervisor | Origin Kicks, Trafford Centre | Oct 2023 – Sep 2024

- Trained new and existing staff on customer service, till procedures and store standards, and coordinated the team during busy trading periods.

Loss Prevention Officer | Selfridges, Exchange Square, Manchester | Sep 2022 – Sep 2023

- Introduced processes across departments that helped reduce shrinkage.

Loss Prevention Supervisor | UNIQLO, Market Street, Manchester | Oct 2020 – Sep 2022

- Trained employees on safety and compliance procedures, and supported management with internal investigations and reporting.

Assistant Manager | Harding Brothers Retail, Avonmouth, Bristol | Jun 2019 – Mar 2020

- Led a sales team onboard a cruise ship, managing day to day performance and developing team members.

Key Holder | Anya Hindmarch, Bicester Village | Nov 2018 – Jun 2019

- Held keyholder responsibility for opening and closing the store, and maintained operational compliance and shop floor standards.
- Built client relationships through personalised service and regular follow up, working towards individual sales targets.

Sales Associate | Ralph Lauren, Bicester Village | Mar 2017 – May 2018

- Maintained a client database to support future contact and repeat business.
- Worked towards individual and team sales targets in a premium retail environment.

ADDITIONAL INFORMATION

- Available from May 2027.
